

Skinwave combines an aqua-delivery system, skin revitalizing solutions and Hydrogen therapy for a multi-dimensional skincare treatment. Solutions rich in Alpha Hydroxy Acid (AHA), Beta Hydroxy Acid (BHA), Hyaluronic Acid and Hydrogen (H2) are infused deep into the skin while gentle extraction exfoliates and cleanses. Skinwave is an ideal stand-alone skin renewal treatment and complement to other procedures for overall skin wellness.

By Eunsung Global.

Target Multiple Skin Concerns

Customize the level of AHA, BHA and Hyaluronic Acid to address top skincare needs: exfoliation, oil control and moisturization.

Hydrogen Therapy Clean

Highly concentrated Hydrogen water reacts with active Oxygen linked to drying and aging and provides antioxidant, anti-inflammation and moisturization benefits.

Enhanced Absorption

Electroporation technology temporarily opens pores to increase solution penetration while red and blue LED provides further skin tone and texture improvement.

Benefits of Contouring Roller

Double-lifting handpiece activates lymphatic circulation, provides muscle relaxation, skin-tightening and lifting effects.

"It's the ultimate complement to brighten skin, improve vitality and tone. Best part? There is zero downtime!... My clients love it!"

Sejal K. Shah, MD

"This is a game-changer for aestheticians and aesthetic practices. The cost per treatment is low, the treatment only takes 20-30 minutes, and the results are immediate."

Nicole Simpson, @aestheticsexpert
